

theta1

Parachute Tracker - End to End Automated Airborne Operations

- Automated Parachute Sign-Out and Turn-In - Eliminate Hand Receipts
- Can Be Integrated Directly in Riser
- Instant Manifest Creation - Digital Manifest with the Ability to Make Changes and Print Instantaneous
- Parachute, Jumper, and Jump Master Sync - Recognize Who is Jumping, What Parachute and Who Conducted the JMPI
- On the DZ, Digital Turn-In Points - Immediate Paratrooper/ Parachute Accountability While Analytically Updating Jump Logs
- Operational Situation Awareness - Distinguish Where Your Assets, Equipment and Paratroopers are in Real Time

Key Features

100% Made in the USA

Weatherproof Housing (IP68), MIL-STD-810, MIL-STD-883H (Water Submersible)

Network Redundancy (Cat M1, Nb-IoT, BLE, LoRa, & NFC)

Rugged Design (Extreme Ruggedization for the Most Demanding Environment)

Extended Temperature Range (-35C to +75C)

Ultra Slim Design

Estimated 3 Year Battery Life

Through unwavering commitment to design principles, blackohm achieves the highest standards of quality and personalized customization, surpassing all expectations. This device provides a highly robust platform that can withstand intense environmental stress. Outfitted with exceptional fault tolerance complete with redundant radios, GPS systems and environmental sensors while still providing tracking and sensing for mission critical applications.
